# Exercise CT 2F – 1

6

## Dollar and Sense

Read the story. Solve the problems.

Meg and her mother went to a yard sale. Meg had 10¢.

She bought a pen for 2¢. Then she bought two books for 3¢ each. Meg's mother bought a pot for 5¢. She also bought a spoon for 3¢.

Meg met 3 friends at the sale. Meg and friends went to another sale together.

Mother came too

1. How much did Meg spend for books?
2. How much did Meg spend in all?
3. How much money did Meg have left?
4. How much did Meg's mother spend?
5. How many friends went to another sale together?

## Finding Facts from a Story

Max the magician put on a magic show. He pulled 5 rabbits from a hat. Then he pulled 8 rabbits from another hat. 3 rabbits were gray, and the rest were white.

After Max did his tricks, all the children clapped their hands. There were 53 girls and 88 boys at the magic show. The best trick Max did was making himself disappear.

1. What is the magician's name?
2. How many gray rabbits did pull from the hat?
3. How many girls were at the magic show?
4. How many rabbits did Max pull from the hats in all?
5. How many white rabbits did Max pull from the hats?
6. How many children were at the magic show?

4

## Exercise 5F - 3

6

1. Sam sees 14 bears in Yellowstone National Park. He also sees 23 deer. How many animals does he see in all?
2. Sam read that 37 bears lived near his campground. But the rangers had to move 14 bears because they stole food from the campers. How many bears still live near the campground?
3. The rangers had to move 36 buffalo out of the park because the herd got too large. There used to be 74 buffalo in the park. How many live there now?
4. A little dinosaur steals 17 eggs from another dinosaur nest. The nest had 41 eggs in it. How many dinosaur eggs are left?
5. Tim and Elsa find some dinosaur bones that weigh a total of 16 pounds. If they find 47 more pounds of dinosaur bones, how many pounds of bones will they have altogether?
6. A tyrannosaurus goes to the grocery store and buys 22 boxes of hot dogs. If the tyrannosaurus eats 14 boxes of the hot dogs, how many does he have left?
7. Charlene ate 16 of the grapes in her lunch box. The lunch box had 34 grapes in it when Charlene started for school. How many grapes are left?
8. Fran's second grade class has 24 children in it. If 15 of the children are sick at home, how many children are left in class?
9. Jack gets 17 wrong on his spelling test. The test had 25 spelling words. How many of the words did Jack spell right?
10. There are 19 children in the school lunch room. The lunch room has 40 seats in it. How many seats are empty?
11. Peggy has been at recess for 13 minutes. If recess is 20 minutes long, how much recess time is left for Peggy?
12. Mrs. Smith tells the children to read 14 pages in the science book and 15 pages in the social studies book. How many pages must the children read altogether?
